

Melex On-Site Long Term Rental Contracts

The On-site Rental includes the vehicle, full vehicle insurance, monthly on-site preventative maintenance service of the vehicle, callouts to site for breakdowns, service spares and replacement parts for the duration of the Rental contract.

Prior to the contract commencement we review the application requirements and provide operational recommendations for site location and terrain, vehicle rotations, routing, charging, inclines and range, driver requirements, vehicle options, programming requirements to ensure suitability and fit for the application.

In cases where the customer needs to Concept test the intended Rental vehicle we are able to run Pilot projects partnering with the customer project leader.

Road Legal vehicles are available should the requirement be for traversing or using Public roads as part of the vehicle routing.

Whats included:

- Rental vehicle new or Refurbished for the contract period
- Full vehicle insurance – excess specified
- Annual road licensing – applies to Road legal models only
- Monthly On-site Preventative maintenance
- Monthly Service Reports
